

ALS – E-Learning

Excellent E-Learning program on ALS by Clinical Skills Development Service.

The aim of this course is to provide healthcare professionals with the knowledge and skills required to provide adult advanced life support (ALS) utilising the Australian Resuscitation Council (ARC) guidelines.

Healthcare professionals are required to be competent in identifying, initiating, and maintaining life-saving measures in a timely and appropriate manner. This course provides the knowledge and skills required to provide effective management of cardiopulmonary arrest.

It's Free and an excellent adjunct to theory for ALS.
